Work Experience

Software Development Engineer II

Feb 2023 – Present

Amazon Web Services

Seattle, WA

- Designed serverless S3 event-based ingestion architecture (SNS, SQS, Lambda, EventBridge) processing 25M+ events/week for 5+ enterprise customers; reduced p99 latency from 60s to 8s by identifying and fixing Lambda provisioned concurrency bug; enabled successful high-traffic customer event
- Led WebCrawler connector development; implemented full CD pipeline adopted as organizational standard by 3+ teams; fixed critical race conditions, SSL handling, and security vulnerabilities
- Led incident response for production outage affecting 156 jobs across 17 customers; performed root cause analysis, coordinated 4-hour rollback, and implemented monitoring to reduce detection time from 5 days to automated alerts
- Built user management APIs and notification service adopted by 3+ internal teams for subscription management and analytics; consolidated 2 feature flag systems into unified framework with 5+ reusable APIs reducing development time by 50%
- Led security integration enabling on-time service launch; implemented authentication tests, resource tagging APIs, and client-side encryption library for DynamoDB; resolved 4+ AppSec requirements meeting all compliance criteria for production deployment

Software Development Engineer Intern

May 2022 – Aug 2022

Amazon Web Services

Seattle, WA

- Built search prototype using React, Python, and AWS enabling unified search across 5+ enterprise applications including document management, messaging, and ticketing systems

Data Scientist

Jul 2018 – Jul 2021

Jio Platforms Limited

Mumbai, India

- Automated KYC (Know Your Customer) document validation for 5,000+ daily documents using Python, OpenCV, OCR, Fuzzy String Matching, and Kafka; reduced processing time by 87%
- Built duplicate detection algorithm for Material Master Data; reduced costs by 10-40% and user effort by 50%
- Built ML-based MRO (Maintenance, Repair, Operations) prediction model achieving 90% accuracy for 95% of materials
- Optimized medication search using NLP and Trie data structures; reduced response time to 30ms

Technical Skills

Languages: Python, Java, TypeScript

AWS: Lambda, ECS, S3, DynamoDB, SQS, SNS, EventBridge, Step Functions, CloudWatch, CloudFormation, CDK

Frameworks: Flask, FastAPI

Tools: Playwright, Git, Docker, Kafka

Data & ML: NLP, spaCy, OpenCV, Scikit-learn

Education

Master of Science in Computer Science | GPA: 3.7/4.0

Stony Brook University

Dec 2022

Stony Brook, NY

Bachelor of Technology in Computer Science | CGPA: 9/10

KJ Somaiya College of Engineering

May 2018

Mumbai, India
